INSURANCE LICENSING & COMPLIANCE OPERATIONS

SUMMARY

Insurance compliance and licensing administrator for a property and casualty claims TPA. Built and ran the weekly audit that confirmed every claim went to an adjuster with a current contract and a license valid in the state of loss, across a 250+ person contracted field workforce. Reduced noncompliant claim assignments from as many as 5 per week to near zero.

SKILLS

Compliance: License and contract compliance auditing and resolution, multi-state adjuster license verification, procedure documentation, PII handling

Operations: Contractor onboarding, contract routing and applicant tracking, cross-system record accuracy, system access provisioning, LMS and certification course administration

Software: Microsoft 365 (Outlook, Excel, Teams, OneDrive), Microsoft Clipchamp, VCA Software, Xactimate, Symbility, Absorb LMS, JazzHR, PandaDoc, Bill.com, Dialpad, Linux (Debian), SQL (MariaDB)

EXPERIENCE

Complex Claims Management Solutions, LLC | 1 yr 1 mo

Property and casualty claims TPA, Dunedin, FL. Fully remote.

Claims Operations Administrator

- Developed, ran, and documented the company's weekly license and contract compliance audit, querying the prior week's claim assignments in VCA, exporting to Excel, and filtering by carrier to check each adjuster's contract status and licensing in the state of loss.
- Caught 2 to 5 noncompliant assignments per week in the audit's early weeks and drove the rate to near zero: resolved most by collecting current license documentation or issuing a replacement contract through PandaDoc, and tracked the rest in an audit workbook, escalating on a defined interval to the HR Director and then the Claims Director.
- Onboarded 250+ contracted adjusters and appraisers from signed contract through system access. Owned the careers inbox where returned contracts and information sheets containing PII and licensing data arrived, then coordinated VCA, Bill.com, and Absorb LMS provisioning with IT, accounting, and claims.
- Cleaned and standardized adjuster records across VCA, OneDrive, and Absorb LMS, correcting inconsistencies at volume so each contractor's information matched system to system.

Claims Specialist (Contract)

- Managed the claims queue across three Florida carrier accounts (Tower Hill, Security First, and People's Trust), prioritizing and advancing files to meet carrier service expectations.
- Advanced up to 150 claims per day and sustained 60+ hour weeks through peak catastrophe response following Hurricanes Helene and Milton.
- Coordinated with claims management, field adjusters, and carriers to clear documentation bottlenecks across VCA, Xactimate, and Symbility.

Arch Staffing / Fish City Grill | 4 yrs

Event staffing and restaurant operations. Allen, TX.

- Ran event operations, kitchen, and guest service for 100+ customers per shift.

PROJECTS

- Built and administer a Debian 13 Linux server as a home lab for continued learning and development.
